

# Education Services

## Leave the technology to us.

### Full Service Technology for Education

Every education organization has different technology needs and budget constraints. You can leverage Cantey Tech's extensive experience in supporting education at all levels, the State Dept of Education, Education Management Organization, School District / Authorizer and at the school level. We want to hear your needs and develop a solution that fits your plan. Our goal is to partner with you to remove the anxiety that technology management can create in education. Our clients range from the standard K-12 brick and mortar schools, to charter schools and unique specialization in virtual charter schools. Cantey Tech supports education in over 18 states and we want to hear from you. We will meet you where you are and work to get you where you want to be. If Cantey Tech is not the answer we will do our best to point you in the right direction.

### Meet Cantey Tech Consulting

Based in South Carolina, Cantey Tech Consulting provides comprehensive IT services for businesses, medical practices, legal firms, manufacturing, and schools across the country. Our experience allows us to understand your unique technology needs. Our expertise enables us to deliver complete solutions, responsive service, and dependable support. Rather than offering generalized products and recommendations, we take a consultative approach that prioritizes partnership. By listening to your technology needs and delivering precise solutions, we make it easier for you to focus on what matters most — your students and staff needs.

Computing

## Assessment / Test Planning

Our project manager will work with your testing team to complete a comprehensive support plan for your test season. This includes guiding your staff in ensuring testing venues will support the technology.

## Lab Configuration

All technical equipment and pretest requirements will be met by our Cantey Team. State and software vendor security requirements will be followed and confirmed.

## Technical Contractors are available for setup and on-site support as needed

Local contractors with background checks can be hired and managed to provide setup and on-site support for testing days and they are sourced locally to minimize cost.

## Logistics

Logistics and shipping will be confirmed with tracking details when equipment is in transit with the carrier.

## Remote Support

The Cantey Tech Assessments Team is available to solve any issue with your order. You will always have our support line, but we give out our direct contact information to make sure your students test as planned.

## Training and Support

Training and Support: We have the most experienced and knowledgeable team in the southeast. With common goals of state compliance and clean data in mind. Our team will guide and train your staff as they navigate the DOE regulations and report with confidence.

## Side by Side School Support

Get the most out of PowerSchool with our team by your side! With this support option, our team will work alongside your school's PS team for a full year of support. We will evaluate data needs and training opportunities and create a plan of support to empower your team to bridge gaps. State reporting and funding deadlines are identified early. We will meet weekly with your team to ensure data stays clean, deadlines are met and that you get the most out of the support plan. The goal is to provide your team with the knowledge and confidence to excel at PowerSchool on their own.

## State DOE / District / Authorizer Support

With this unique support option, our team members will work with you to develop a comprehensive calendar and plan of support based on your needs. Whether it is training opportunities, data audits, or direct school support, we can help.

## Chromebook Remote Management

Our team will manage your inventory of Google licensed Chromebooks in the Google Management Portal and provide support for all your student and staff needs. Including configurations changes to support testing and daily support for students to seamlessly complete their work in your school or in a home environment.

## Chromebook as a Service (CaaS)

Let us do the hard part. Your school will work with our program manager and we will ship Chromebooks directly to student's homes or your school. Our service desk will trouble shoot any issues and ship out a tested replacement device to minimize student learning downtime when there is a problem. Since the Chromebooks are provided as a service you don't have to worry about replacing inventory in a few years that will be built into this program. Your monthly costs will be transparent and easy to budget for as your school grows.

## Project Lead the Way

Our cloud computing solution allows you to replace high-end desktops and laptop devices costing thousands of dollars with an economical Chromebooks and external monitor with the performance needed for engineering and design software that are a must in today's STEM programs in high performing schools.

## STEM Learning Remotely

Educators are no longer limited by in person labs. Students can work on their STEM projects at home or anywhere with a robust reliable internet connection...extending the learning window. Take all those Windows based applications on the road with the students using Chromebooks.

Whatever your technology challenges may be, Cantey Tech Consulting is ready to deliver the customized solutions you need.
